

## PRODIGY

The hero has arrived – official flagship device, featuring top-of-the-line hardware and the most comprehensive software

- XTOOL's first device with online repair data access
- Professional OE Level Diagnostic Scan Tool
- Type-C Modern Rapid Charging Technology
- Extensive Coverage of Euro, Asian and Domestic Vehicles
- Support DoIP, CANFD, and J2534 protocols
- Tesla diagnostics available (Tesla-specific cable sold separately)
- First to support Jaguar & Land Rover online/offline coding & programming
- Equipped with PreScan & PostScan diagnostic reports for professional workflow
- FCA SGW access supported – ideal for U.S. market vehicles
- Massive 13.3" display for superior data stream visualization
- Comes with a portable charging dock for added convenience
- Upgraded large-screen VCI status display for intuitive operation
- Powered by Qualcomm chipset – faster and more reliable

## XPORTAL

J2534 Pass through device

- Compact pocket-sized design makes it easy to carry and use on the go
- Supports both wired and wireless connections for flexible operation
- Features simple driver installation for quick setup
- Compatible with Dual-CAN protocol, DoIP, and CAN-FD for advanced vehicle communication
- Supports OEM software from over 10 major vehicle manufacturers, including Audi, BMW, Mercedes-Benz, Honda, and Toyota

## XT90

Advanced automotive diagnostic system

- Operating System: Android 10
- Processor: 4 Core 1.50GHz
- Memory: 4G RAM, 128G ROM
- Display: 9.7-inch, 1024x768P
- Communication: Wi-Fi, Wired
- Battery: 6400 mAh, 7.2V
- Free software update: 3 years
- Hardware warranty: 2 years
- Full-system diagnosis, equipped with endoscope, 44 special functions including IMMO software
- Support topology diagram, online and offline coding & programming

## XT80 / XT80W

Professional and smart diagnostic device with key programming

- Operating System: Android 10
- Processor: 4 Core 1.50GHz
- Memory: 4G RAM, 64G ROM
- Display: 8-inch, 1024x768P
- Battery: 5000mAh, 7.3V
- Free software update: 3 years
- Hardware warranty: 2 years
- Full-system diagnosis, equipped with endoscope, 40 special functions including IMMO software
- Support topology diagram, offline coding & programming

## XT70 / XT70W

Entry-level model with full system diagnostic functions

- Operating System: Android 10
- Processor: 4 Core 1.50GHz
- Memory: 2G RAM, 64G ROM
- Display: 7-inch, 1024x600P
- Battery: 2500mAh, 7.3V
- Free software update: 3 years
- Hardware warranty: 2 years
- Full-system diagnostic, support read and clear DTC, live data read and freeze frame read
- 37 special functions, like ABS bleeding, injector coding, oil reset, EPB etc.

## XT50

Compact, powerful gasoline diagnostic tool for accurate fault detection

- Compatible with full-system diagnostics
- Supports WiFi 2.4/5G wireless communication
- Supports CAN FD communication
- Includes 25+ special functions
- Life time upgrade validity

## E2S

EV smart diagnostic system

- Battery pack fault detection across 3,000+ vehicle models
- Real-time data readings with advanced topology mapping
- 1,600+ high-definition battery pack wiring diagrams
- Supports functions like motor drive, 48V battery software/hardware resets
- 50+ special functions like key programming, ECU resets, injector coding, etc.

## E2 Pro

Top-tier EV smart diagnostic system

- Provides advanced diagnostic support for Tesla models
- Comprehensive powertrain controller diagnosis and repairs
- Offers off-vehicle testing for DCDC converters, compressors, and motor controllers
- Reads SOC (State of Charge), SOH (State of Health), and fault codes
- Enables data flashing and repair for 12V/48V/BMS modules in Mercedes-Benz, BMW, and Tesla vehicles
- 55+ special functions like key programming, ECU resets, injector coding, etc

## X<sub>2</sub>Prog ECU Programmer

Powerful programmer to unlock features and boost performance

- X<sub>2</sub>Prog (ECU Programmer)
  - EEPROM Reading/Writing (Chip off board) (with EEPROM board)
  - ECU Reading/Writing (BOOT method) (with XTA004 cable) (MC9S12 not included)

- X<sub>2</sub>AEP (Advanced EEPROM Programmer)
  - EEPROM Reading/Writing (Chip onboard/offboard)
  - MC9S12 ECU Reading/Writing Plugin (BOOT method) (with XTA004 cable)
  - Allows X<sub>2</sub>Prog to read MC9S12 ECUs

- X<sub>2</sub>CANBox (CAN Communication Interface)
  - ECU Programming (Bench Method) (with XTA005 cable)
  - Mercedes-Benz Communication Control in All-Keys-Lost situations (with XTA006 cable)

- X<sub>2</sub>TPU (Transponder Precoding Unit)
  - Transponder Reading/Writing
  - Remote Frequency Reading
  - Transponder Status Reading

- X<sub>2</sub>MBIR (IR Key Precoding Unit)
  - Mercedes-Benz Key Programming
  - Read EIS/EZS Data (with XTA007 emulator)
  - Read/Write IR Key Information

## COMPASS / COMPASS MASTER

The guide has awakened – official flagship 10-inch device

- Access to online repair data available (with paid subscription)
- Full-system diagnostics for all vehicles (excluding U.S. region)
- Supports Auto Auth secure gateway access
- BMW test plans support included
- First to offer Jaguar & Land Rover online/offline programming
- Tesla diagnostics supported (Tesla cable sold separately)
- Qualcomm High-end chipsets with advanced algorithms
- Equipped with PreScan & PostScan diagnostic reports for professional workflow
- Support DoIP, CANFD, and J2534(optional)
- 10.1" Display (1920 x 1200) / Android 10.0 / 8+128GB Memory / 9600mAh Battery

## D9HD

Diesel diagnostic tablet

- 4-core processor, 4+128GB memory, 9.7-inch capacitive touchscreen (1024x768 resolution)
- Compatible with 12V and 24V passenger cars, commercial vehicles, hybrids, EVs, light trucks, and heavy-duty vehicles
- Full diagnostic capabilities including code reading / clearing, actuation tests, adaptations, and ECU coding
- Live data displayed in text, graph, analog, and digital gauge formats for easy review and analysis

## XTireProbe

The scout has evolved – all-in-one solution for TPMS, diagnostics, and service functions

- Comes with independent VCI – wireless activation with no cable restrictions
- Compact, premium handheld device integrating TPMS, diagnostics, and service functions
- All-new UI and redesigned body for a smoother experience
- Optimized Linux system – ultra-fast response and upgrade speed
- 1-second TPMS upgrade (for individual vehicle models)
- OE number lookup for faster model-based sensor identification
- TPMS Toolbox – supports remote frequency detection for identifying sensor frequencies
- Sensor diagnostics – check voltage and temperature (XTOOL sensors only), useful for condition assessment or scheduled replacements (2 years/40,000km)
- Smart TPMS Diagnosis – automatically matches vehicle menu when OBD is connected and online

## X100PAD Elite 2

Professional key programming tool for locksmiths

- Capable of various key programming operations, like read immobilizer data, calculate pincodes, add keys, all keys lost and remote programming, as well as advanced functions like EEPROM/FLASH programming, parameter reset and module replacement.
- Supports 70+ car brands and 3,000+ models, including mainstream American, Asian, and European vehicles.
- Both wireless and wired connections are available.
- Free software update: 2 years
- Hardware warranty: 2 years

## X100PRO3

Pocket key programmer gives you the most convenience

- IMMO programming for more than 30 brands
- EEPROM programming and various functions
- Support 8 special functions
- Support full diagnostic functions
- Lifetime free updates

## KC501

Professional Key & chip programmer

- Read & write keys and read key remote frequency
- Generate dealer keys
- Supporting read and write MCU / EEPROM chips, read and write Mercedes Infrared keys
- Supporting PC connection

## A30M

Full system portable scan tool

- Both iOS and Android platform are supported
- Full brands and systems are covered
- 23 special functions, like service light reset, DPF regeneration and EPB reset
- Support 9 languages
- Portable design for use anywhere

## TP150

TPMS diagnostic device: precise & powerful

- Supports TPMS diagnostics for 95%+ car models
- Integrates 315MHz and 433MHz dual frequency, Dual sensor types (clamp-in / snap-in)
- Program up to 8 sensors at the same time
- 100% ID clone-able sensor with no relearn required

## X100PADS

7-inch key programming tablet

- Support key programming for most of the models on market
- Can match keys in both add key/all keys lost situations
- Comes with EEPROM Adapter for module on bench works
- Read/clear fault codes after programming
- Contains 30+ special functions

## ANYTOYO SK1

- Smart key for 8A & 4A chip
- Toyota/Lexus key emulator & signal collector
- Emulate vehicle keys by immobilizer data read by OBD
- Allow emergency start in all keys lost situation
- Supporting key cloning process in add key / all keys lost situations for 2013+ Toyota models with the smart key

## AD20Pro

OBD system diagnosis

- Read & clear codes on U.S., Asian, European, and Chinese vehicles (1996 and newer)
- Provides services like smog checks and maintenance light resets
- Performs deep vehicle checks, shows live data, and monitors battery health
- Download free software for your vehicle brand with no additional fees
- Record trips and fuel consumption
- Features an integrated driving monitor to help improve driving skills

## TS100PRO / TS218 NFC

Programmable / NFC universal tire pressure sensor

- Integrated 315MHz & 433MHz Dual-Frequency
- Supports over 98% of global vehicle models
- Equipped with a high-performance sensor chip
- Offers a 10-45° adjustable range, ensuring compatibility with various wheel installations (TS100PRO)
- Leverages NFC technology to enable direct sensor configuration via mobile devices (TS218 NFC)

## InPlus IK618E

Compact and cost-effective automotive key programmer

- 7.0-inch, 1024x600 px sunlight-adaptive touchscreen – a compact yet fully functional device
- Supports basic IMMO functions, also can achieve advanced ones
- Free software update: 2 years
- Hardware warranty: 2 years

## KS-1

- 5 in 1 simulation card
- For Toyota/Lexus AKL: Read original car data from OBD to generate simulation key
- Wide range of models: Support Toyota 94/D4, 98, 39, 88/A8/A9 type
- Can be reused: Turn off the power or remove the battery to restore the initial state
