X100PAD Elite2

Evolved from the classic X100PAD Elite, the new 8-inch X100PAD Elite2 delivers faster performance and smoother operation with the brand-new Android 10 OS and app platform. Designed by XTOOL for professional locksmiths, it's one of the most powerful and reliable key programming tools on the market.

ADVANCED KEY PROGRAMMING CAPABILITIES

Can perform a variety of key programming operations such as reading immobilizer data, calculating PIN codes, adding keys, handling all keys lost scenarios, and remote programming.

EEPROM/FLASH PROGRAMMING

Enables EEPROM/FLASH programming in modules. Allows locksmiths to modify key-related data in vehicle electronics, enhancing key customization and security system adjustment flexibility.

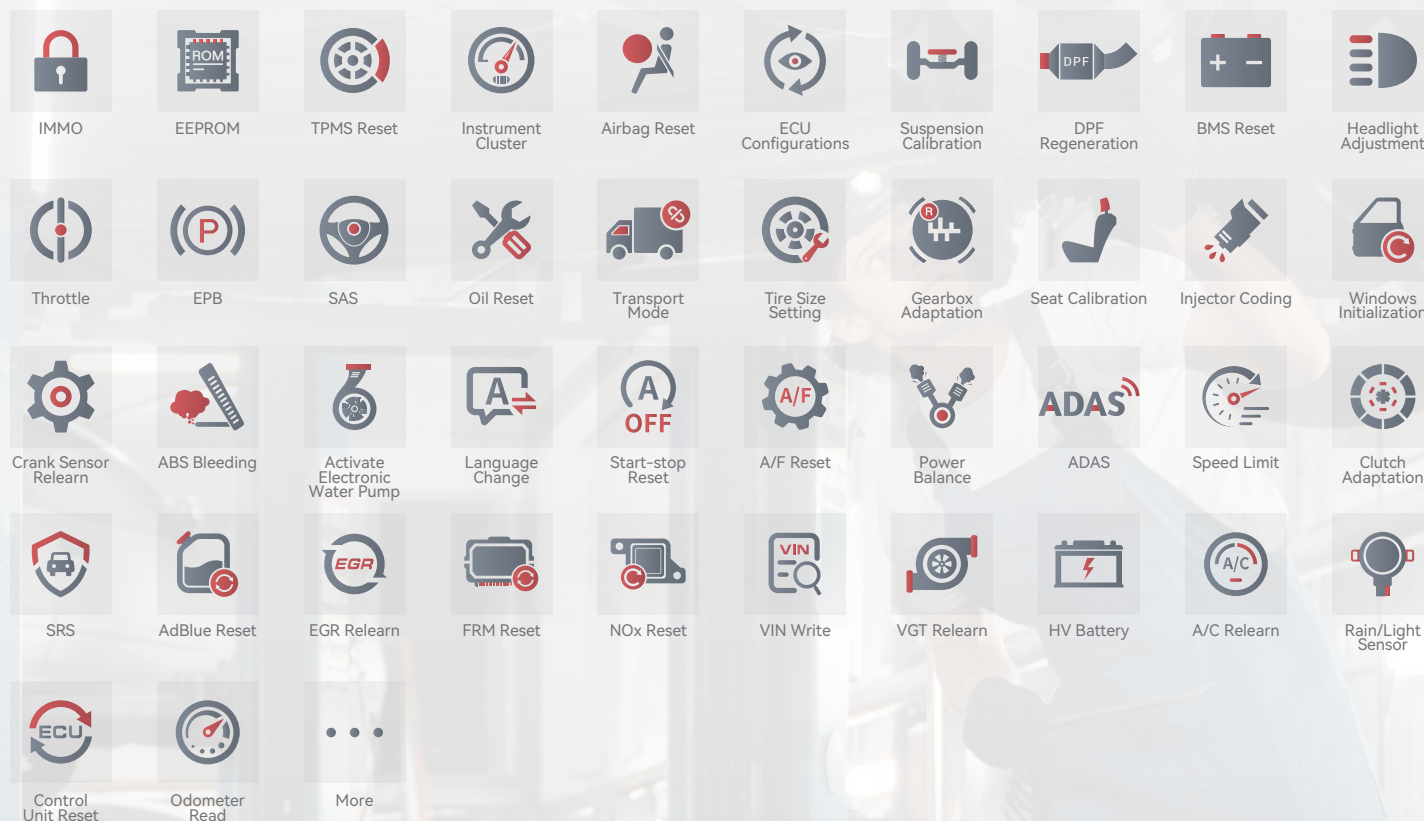

BENCH APPLICATION FOR MODULE DATA READING

Allows reading of EEPROM&FLASH files inside modules through BENCH without the need for soldering wires.

WIDE VEHICLE COMPATIBILITY

Covers over 70 brands and 3,000 models (including mainstream US, Asia, Europe). Ensures locksmiths can use it for many vehicles, enhancing practicality.

SPECIAL FUNCTIONS

SPECIFICATIONS
