

X100 PADS

X100PADS is an automotive key programming device with a 7-inch LCD display and Android 10 OS, designed for locksmiths, vehicle owners, and car mechanics. It supports vehicle programming for 2,000+ models under 60+ car manufacturers, providing solutions for reading immobilizer data, extracting pincodes, adding keys, all keys lost, remote programming, etc.

COMPACT YET POWERFUL

A 7-inch engineering tablet with 2GB RAM, 64GB storage, and the latest Android system—delivering smooth and flawless key programming.

ADVANCED KEY PROGRAMMING

Connect via OBD to add smart or non-smart keys, even with all keys lost. Features include immobilizer data reading, pincode extraction, and key deletion.

EXTENSIVE VEHICLE COVERAGE

Supports 60+ brands and thousands of models, including most JDM and USDM vehicles.

READ / CLEAR FAULT CODES AFTER PROGRAMMING

With built-in diagnostic functions, X100PADS can easily detect issues occurring before, during, and after the programming process.

X100 PADS

SPECIAL FUNCTIONS
